

## Environmental Policy

---

MCA Recycling is a company which can today draw on more than 20 years of experience in waste management and the introduction of selective sorting systems.

In order to preserve the environment for future generations, MCA Recycling as well as each of its staff member undertake continuously, beyond the environmental legislation in force, to reduce the impact of their activities on the environment and to prevent every form of pollution. This commitment consists of:

**1) Managing energy rigorously thanks to the following actions:**

- Continuation of the insulation of the building's process
- Reduction of basic consumption
- Awareness raising among employees for energy conservation
- Choice of equipment in accordance with its energy profile

**2) Continuous fuel consumption monitoring:**

- Monitoring of fuel consumption depending on the type of ride (urban, highway) and the vehicles used

**3) Diminishing the volume of waste sent for incineration:**

- Enhancement of awareness for selective sorting among our customers
- Production of selective sorting tools adapted to our customers and to new legislations
- Enhanced on-site sorting by our staff relating to the waste collected from our customers
- Assessment of the environmental benefit of selective sorting by customers
- Search for new recycling programs and reuse chains (circular economy)

**4) Using consumables in accordance with their environmental impact:**

- We want to promote the purchase of ecological office equipment as well as ecological maintenance and cleaning products

**5) Implementing an efficient internal environmental control:**

- With the involvement of the company's staff, we verify regularly that all the necessary means and resources are deployed to implement environmental policy

6) **Becoming an environmental management model for our customers and partners:**

- We want to ensure an optimal quality service in maintaining an ongoing, transparent and constructive dialogue with our customers and suppliers to find innovative and sustainable solutions.
